

END OF LIFE NOTIFICATION

Courbevoie, France
15th September 2025

Object: End of Sale Declaration – MorphoWave XP

Dear Partners and Customers,

We would like to inform you that we have initiated the end-of-life process for the **MorphoWave XP** contactless fingerprint terminal.

Several key components have recently been declared obsolete, which limits our ability to continue production. As a result, the MorphoWave XP can only be manufactured in limited quantities until its official end-of-production date.

Please find here the associated products' part numbers that are impacted by this end-of-life notification:

Part Number	Description
293722301	MorphoWave XP- MD
293722319	MorphoWave XP- MDPI
293771247	MorphoWave XP- MDPI-M

The next important milestones are listed below for your knowledge:

- **15th September 2025: End of Security Support & End of Life notification.**
At this step, please note that
 - IDEMIA won't propose warranty extensions to the clients for the MorphoWave XP anymore.
 - Firmware updates will be available until the official end of life of the product only for major bug corrections that are still possible to fix.
 - IDEMIA declares the end of security support officially for the MorphoWave XP. In case of public and exploitable vulnerabilities/security issues on the product, IDEMIA will study a remediation plan. Security updates will be subject to prior evaluation and may not be possible
 - Service support and repairs will be available as usual until the official End of Life of the product.
- **19th December 2025: End of Sales / Last buy order.** Date after which IDEMIA won't accept additional Purchase Orders (POs) from clients anymore.
We encourage our clients to inform us as soon as possible of any forecast and upcoming PO they would have.
Any new PO will be processed and acknowledged or not depending on the remaining stock of products at the time of reception.
- **31st of March 2026: End of Deliveries.** Final deliveries will be completed considering the received and acknowledged POs within the above timeframe.
- **31st of December 2027: End of Life** of MorphoWave XP.
 - Firmware updates: IDEMIA do not commit to fixing any issue that may be raised after this date.
 - After this date, service support including repairs will be done in a "best effort" principle and within the frame of the T&Cs and upon availability of the components.

The objective of this official notification is also to inform our clients to start the transition to the new MorphoWave XP2 as soon as possible.

Please find the part numbers of the MorphoWave XP2:

Part Number	Description
293809715	MorphoWave XP2 – MD
293817486	MorphoWave XP2 – MDI-M

The MorphoWave XP2 is designed to deliver enhanced performance, advanced anti-spoofing capabilities, and reinforced protection against intrusion attempts. The terminal also brings additional functionalities such as the Apple Wallet compatibility and has an evolutive architecture using software licenses. Of course, as it is based on an updated platform, security upgrades will be regularly available for our clients.

As you know IDEMIA is particularly sensitive to security aspects. Our mission is to keep our clients' assets secure.

As such, to keep your systems up to date and fully protected, we strongly encourage you to initiate the transition to the new MorphoWave XP2 as soon as possible considering the above milestones.

Please do not hesitate to contact your account manager or your system integrator to get more information about the end-of-life process for MorphoWave XP.

Thank you for your continuous trust in our products and solutions.

ANNEX: END OF LIFE PROCESS – MILESTONES DEFINITION

Milestone	Description	Timeframe
End of Life Announcement (EoL Announcement)	<p>The first step of the End-of-Life process is to announce it to our clients and provide the dates of the important milestones for the full end of life process. The End of Life announcement encourages our dear clients to take the appropriate actions to anticipate the shortage of products that is announced.</p> <p>The anticipation can be two ways:</p> <ol style="list-style-type: none"> 1- Buying enough devices in advance to keep the business running for the entire lifetime of the product in client side. 2- Preparing the switch to the potential new generation of products that is introduced as a replacement for the product subject to the EoL announcement. 	15 September 2025
Last Buy Order (LBO)	<p>This milestone corresponds to the last date after which the product won't be available for sale anymore. At this stage, clients will see their purchase orders acknowledged or not depending on the remaining stock of products and components in IDEMIA's side.</p>	19 December 2025
Last Shipment Date (LSD)	<p>This step corresponds to the last possible date of delivery for the product subject to the EoL announcement. The actual shipping date depends on lead-times and will be communicated at the time of reception of the PO.</p>	31 March 2026
End of Life (EoL)	<p>The effective date for the End of Life of the product. After this date, the product will become officially obsolete. IDEMIA won't commit on any support after this date and any support request will be analyzed by IDEMIA who keeps the right to reject it if we judge it impossible to achieve considering the End of Life status of the product. IDEMIA will always commit on a best effort principle when it comes to support its clients for an end of life product but no commitment can be taken towards the client after the End of Life date is reached.</p>	19 December 2027
